

## 3 first prizes for RAHN-Cosmetic Actives!

RAHN scooped 3 first prizes at the BSB Innovation Award ceremony for Cosmetics for MYRAMAZE®-ESSENCE, DEFENSIL®-PURE and RADICARE®-ECO.

MYRAMAZE®-ESSENCE (Category: Natural products / actives / mood enhancing and joy)

Stressed and dehydrated skin can look sallow and dull. If you are also in a depressed mood, this has an additional negative effect on the appearance of your skin. MYRAMAZE®-ESSENCE revitalises the skin with the help of all the senses: its scent compounds can lighten the mood even at low-threshold concentrations. There is an effect on bitter taste receptors in the skin, thus reinvigorating it and returning it to a healthy state. Skin becomes relaxed and luminous.

DEFENSIL®-PURE (Category Raw: materials/ actives / improvement of difficult skin types)

Very dry atopic skin suffers constantly from physical damage and a weakened skin barrier. This opens the door for undesired bacteria entering deeper layers of the stratum corneum and releasing toxins. These toxins can activate the inflammasome, leading to severe inflammation and cell death. DEFENSIL®-PURE is obtained by high-tech fermentation of organic gold millet. It naturally balances the skin microbiota, strengthens the skin barrier and moisturises

particularly dry skin. Furthermore, it improves the complexion, and counteracts atopic eczema.

RADICARE®-ECO (Category: Raw materials/ functionals and recipients / functionals)

An urban lifestyle is exciting, but we often have to find a strategy to manage daily stress. This includes hair and scalp that are daily exposed to damaging mechanical and chemical stressors, to ever-increasing air pollution and the impact of UV irradiation. RADICARE®-ECO forms a non-occlusive shield against urban pollution, improves hair integrity and gloss and intensifies the colour tone of hair colorations.
